

# SLAT TEX PANELS

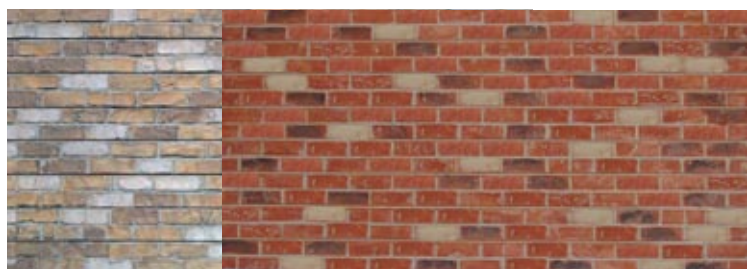

HIGH DENSITY FOAM WITH MDF BACK

Our Slat Text Panels are a one of kind innovation for the retail display market, allowing stores to transform ordinary merchandise setups into a themed decor. They are made from a composite of high density foam and MDF board that are designed to accept slatwall shelving and fixtures. The Merchandise hooks easily slide in and can be horizontally moved anywhere on the panel. There are 7 rows per 4' x 8' panel.
